

Aaron Jordan

Sculptor Foreman/ Art Director

With this resume I hope to introduce my skill set as a solid leader to a great team on your next project. As Sculptor Foreman, for the past several years, I have been in charge of every detail of the sculptural aspects and needs of construction. From Budgeting to proper set-up of the work space, hiring the crew and completion. I run a tight crew which works quickly, happily and efficiently. Classically trained as a sculptor and having worked in the film industry for decades (as a sculptor foreman, construction foreman, carpenter, sculptor, and most recently as an art director), I know the job requirements and can translate them to the team with confidence and precision. Please follow up with the references listed should you have any questions. Films listed here-in are Full Run hires.
